Usage Steps ..... 1

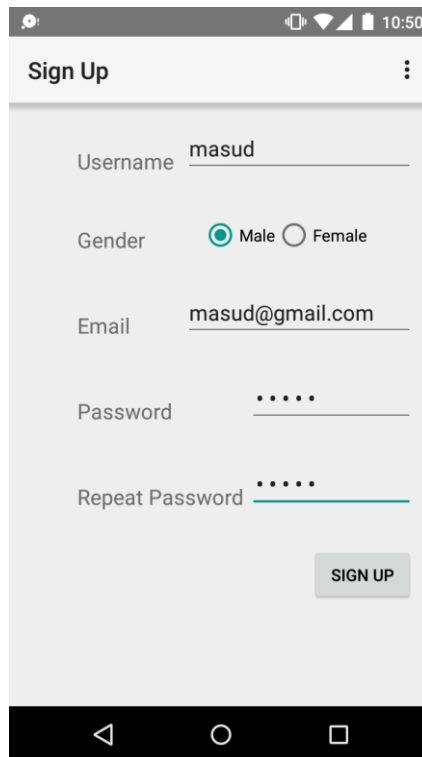

## Introduction

Welcome to Traffic App, an android-based social media dedicated to city traffic!

We may not be able to prevent traffic jams all of a sudden, but together, we can help each other make smart choices on the road or, at the very least, be there to share our grievances over pathetic traffic situations.

## Usage Steps

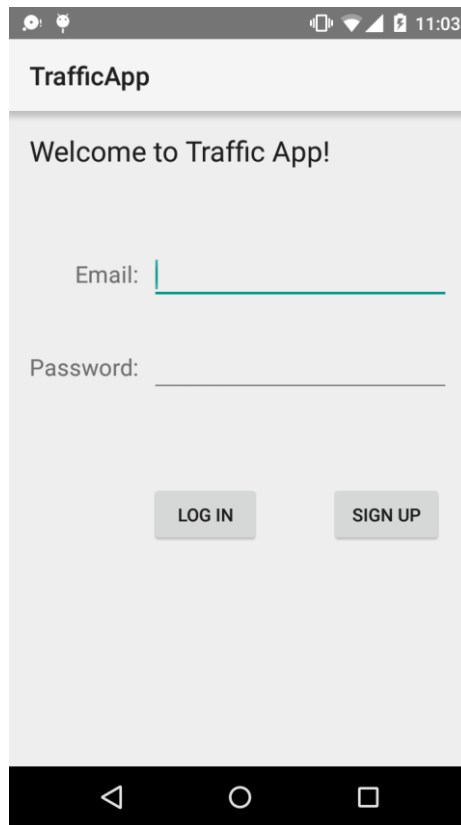

- Step 1: **Sign Up**  
Register with just an email and password to get started. You may choose any username you like!

The screenshot shows the 'Sign Up' screen of the Traffic App. The screen has a light gray background. At the top, there is a status bar with icons for signal, Wi-Fi, battery, and the time 10:50. Below the status bar is a header bar with the text 'Sign Up' and a three-dot menu icon. The main content area contains five form fields: 'Username' with the value 'masud', 'Gender' with radio buttons for 'Male' (selected) and 'Female', 'Email' with the value 'masud@gmail.com', 'Password' with five dots, and 'Repeat Password' with five dots. A 'SIGN UP' button is located at the bottom right of the form area. At the very bottom of the screen is an Android navigation bar with back, home, and recent apps icons.

- Step 2: **Log In**

Log in with the email and password you used to register for the app.

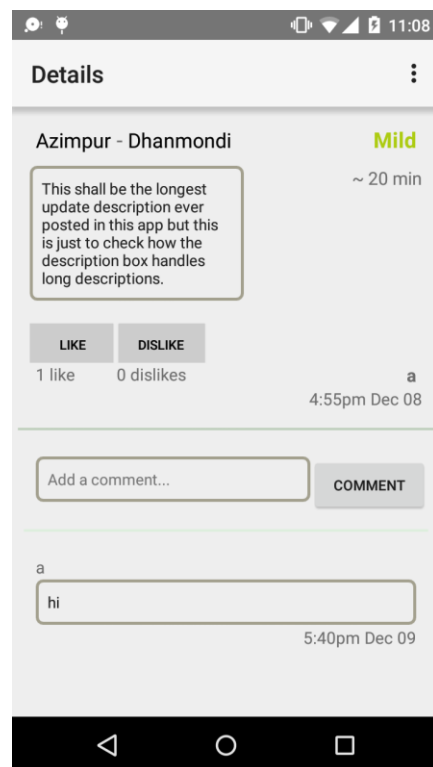

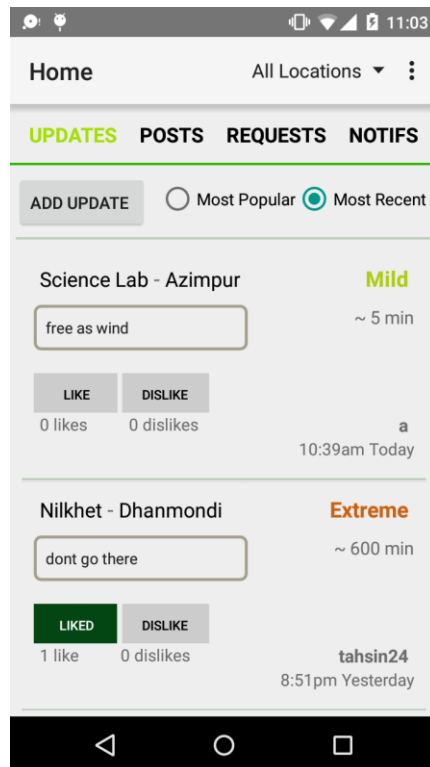

The screenshot shows the login interface of an application titled "TrafficApp". At the top, there is a header bar with the app name. Below the header, a welcome message "Welcome to Traffic App!" is displayed. The main area contains two input fields: "Email:" and "Password:". The "Email:" field has a blue underline, and the "Password:" field has a grey underline. Below these fields are two buttons: "LOG IN" and "SIGN UP". The screen is framed by a dark grey status bar at the top showing system icons and the time "11:03", and a black Android navigation bar at the bottom.

▪ Step 3: **Home**

This is the heart of the app! This page allows you to switch between updates, posts, requests and notifications each of which have been uniquely created to give you the best traffic experience.

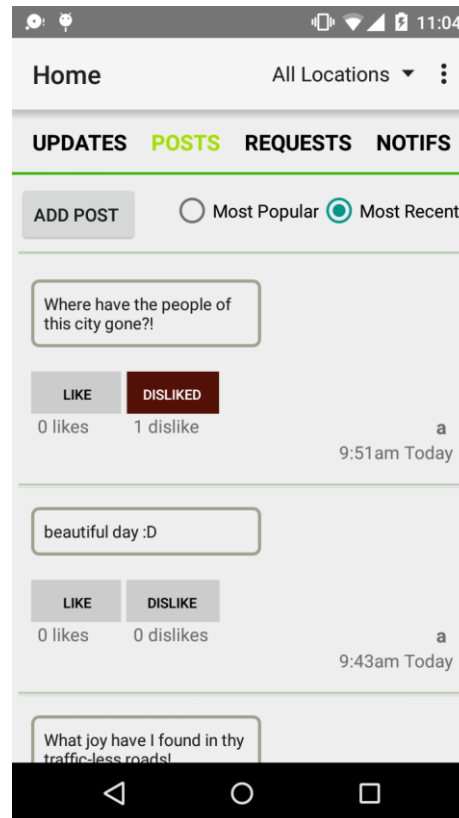

✓ **UPDATES**

This window allows you to view updates from people all over the city which you can sort according to the most recent updates or the most popular ones. Popularity of an update increases when you 'like' it. You can also add your own update for a particular route and 'dislike' any update you find to be inauthentic. Moreover, you can add comments for clarifications or just to leave a small 'thank you' note for saving you valuable time!

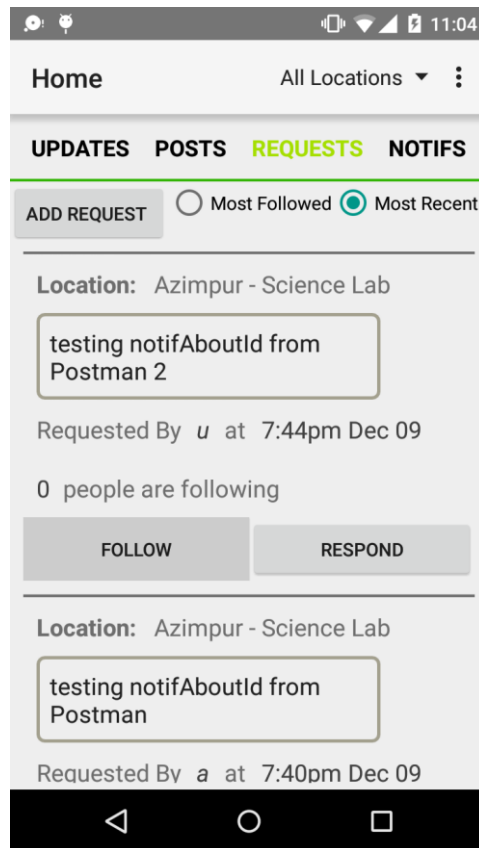

✓ POSTS

This page allows you to discuss about random issues on the road and see other people's discussions. You can announce about an upcoming traffic event and see other people's announcements as well. Like updates, you can 'like' and 'dislike' these posts and sort according to most recent and most popular posts. Comments can be made as well to help you make a healthy conversation.

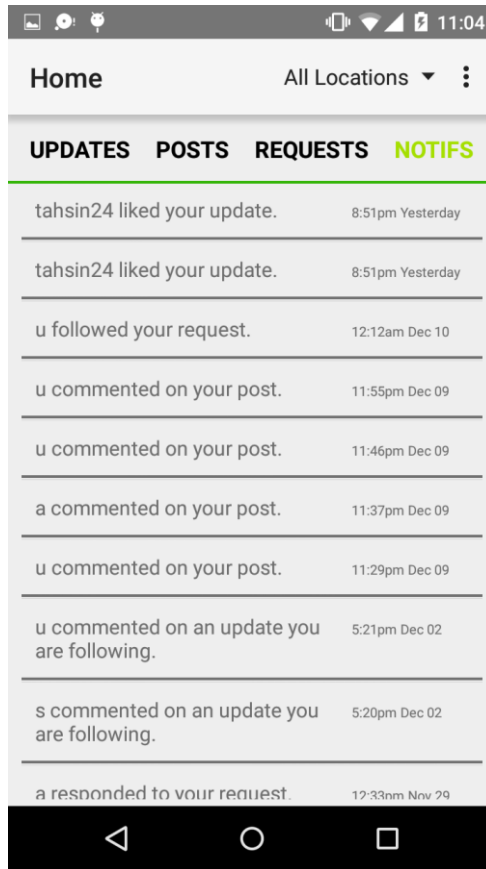

✓ REQUESTS

This page gives you the opportunity to request for an update on a particular route or follow other update requests that interest you. You will be notified when someone responds to those requests. In case you think you can help someone with a request, you can respond to it as well.

✓ NOTIFS

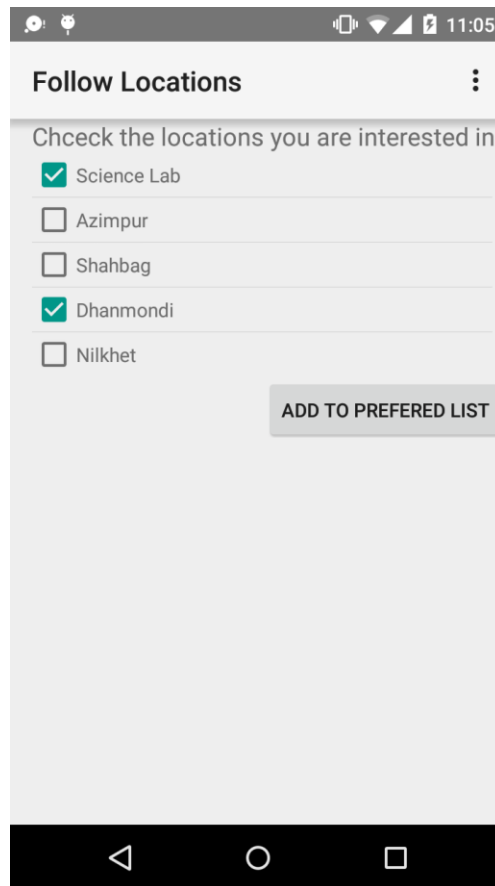

This window notifies you of events that you want to know about. These include someone liking your update or post, requesting an update on a location that you are following (see below), following a request you made, responding to a request you made or are following. You will receive a notification whenever someone comments on your post or on a post you have commented on before.

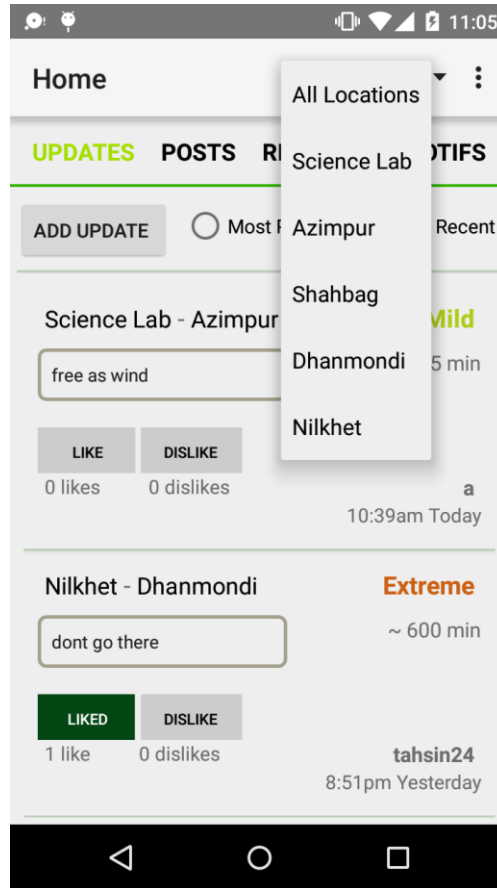

- **Step 4: Follow Locations**

TrafficApp's success lies on people helping other people. Following locations you travel by regularly allows you to do just that! When you follow a location, you will receive notifications from people requesting updates on the location, giving you the opportunity to help them out if you can.

- **Step 5: Search By Location**

Don't want to see things about locations that does not concern you? No problem, you can search updates, posts and requests by any location you like!

Hope this brings a positive change in your daily life!
